Miss Pearl's Country Cookin'

Mummy Toes

Original recipe makes 48 toes

- 1 (16 oz) package cocktail sausages
- 12 (6 inch) flour tortillas
- toothpicks
- 1/4 cup ketchup, for garnish
- 1/4 cup mustard, for garnish

Preheat an oven to 375 degrees F. Line a baking sheet with aluminum foil. Make a small slit into one end of each cocktail wiener to resemble a toenail. Cut the tortillas into strips 4 inches long by 1 inch wide, and place onto a microwave safe plate. Cook the tortillas in the microwave a few seconds until pliable. Wrap each sausage with a strip of tortilla, and secure with a toothpick. Make sure the toenail side is sticking out. Place the mummy toes onto the prepared baking sheet. Bake in the preheated oven for 10 minutes. Remove from the oven, and allow to cool slightly. Place a squirt of ketchup or mustard where the wedge is to resemble a bloody toenail, or of course an infected toenail. Serve to unsuspecting guests.

S'mores Apples

original recipe makes 6 servings

- 6 Granny Smith apples
- 6 wooden sticks
- 1 (14 oz) package caramels, unwrapped
- 2 tablespoons water
- 1/2 teaspoon vanilla extract
- 1 1/2 cups miniature marshmallows
- 1 1/2 cups crushed graham crackers
- 1 cup semi-sweet chocolate chips

Insert wooden sticks 3/4 of the way into the stem end of each apple. Place apples on a cookie sheet covered with lightly greased aluminum foil. Combine caramels and water in a saucepan over low heat. Cook, stirring often, until caramel melts and is smooth. Stir in the vanilla. Dip each apple into the caramel and gently run apples around insides of saucepan to scrape off some of the caramel. Scrape excess caramel from the apple bottoms using the side of the saucepan. Combine the miniature marshmallows and graham crackers on a dinner plate. Roll the apples in the mixture to coat. Place on the aluminum foil and chill. Put the chocolate chips in a microwave-safe bowl. Cook in the microwave for 30 second intervals, stirring between each, until melted and smooth. Drizzle over the apples and return them to the refrigerator until ready to serve.

Bats & Cobwebs

Original recipe makes 6 servings

- 1 (8 oz) package farfalle (bow tie) pasta
- 1 pound ground beef
- 1 small onion, chopped (optional)
- 1 (28 oz) jar pasta sauce
- 8 oz mozzarella cheese, cut into 1/2 inch cubes
- 1/4 cup grated Parmesan cheese

Preheat oven to 400 degrees F. Fill a large pot with lightly salted water, bring to a rolling boil over high heat. Stir in the bow tie pasta and return to a boil. Boil pasta, stirring occasionally, until cooked through but still firm to the bite, about 12 minutes. Drain well. Cook and stir ground beef and onion in a large skillet until beef is no longer pink, about 5 minutes. Drain fat. Stir in pasta sauce and bring to a boil. Reduce heat to simmer. Stir cooked pasta and half of the mozzarella cheese into the sauce; toss to combine. Transfer to a 2-quart baking dish. Top with remaining mozzarella and Parmesan cheese. Bake in preheated oven until lightly browned and bubbly, 15 to 20 minutes.

Witch Hats

original recipe makes 32 servings

- 2 (16 oz) packages fudge stripe cookies
- 1/4 cup honey, or as needed
- 1 (9 oz) bag milk chocolate candy kisses, unwrapped
- 1 (4.5 oz) tube black decorating gel

Place a fudge stripe cookie with bottom side up onto a work surface. Smear a small dab (about 1/8 teaspoon) of honey onto the bottom of a chocolate kiss, and secure the candy piece to the center of the cookie, covering the hole. Use decorating gel to pipe a small bow onto the cookie at the base of the candy piece. Repeat with remaining ingredients.

Hi! WWCF, 56, 5'2", looking for a gentleman, preferably 60+, who loves God first and wants some company to do things with, like long drives in the country, traveling, camping in good weather and fishing if you bait my hook and take the fish off! I'm a nonsmoker and non-drinker. I love animals of all kinds and have a few. Looks are not important to me, the heart is. I would like if you were comfortable talking, but just as comfortable not having to talk and be ok with each other's silence. I am interested in what your likes are too. We don't have to be soulmates to enjoy each other's company, but wouldn't it be nice if it turned out that way? PTP 473

Widowed white female, 70 years old, looks 60, a little full figured. I'm blonde, green eyes, 5' 7" tall. I split my time between Jackson, TN and Springville, TN (camper). Love gospel music and most music, traveling, outdoors, reading, RVing. I am honest and loyal and do not smoke (I am allergic to smoke). I have two senior dogs that are well mannered, do not shed, and very clean. They sleep most of the day. No alcoholics, druggies, or players. I don't have time for such nonsense. PTP 474

I am a male looking for a male to get together. I am 60, outgoing, don't drink, smoke, or do drugs, and safe. Looking to go drink coffee, coke, or just set and talk. Age and married ok, 20 to 70 that would like to get out a little for fun and see what happens from there. Will answer all. I live alone but must be very discrete is a plus. Must live in or around Paris, or pretty close to Paris and must be clean. Send address or phone number and a snapshot if you can. Lonely and looking. PTP 476

SWM looking for a woman between 50 & 60 to share life with. I have a lonely heart. I am 5'9 and 135 lbs. I will answer all replies with a mailing address. PTP301

Any man who has old values that we grew up with, but somehow have forgotten. Honesty, truthfulness, faithfulness, respect. I smoke, so smokers okay, don't drink, but I don't mind social drinkers. Get in touch and find out how much we have in common. PTP 478

My best friend and lover was killed in auto accident by drunk driver. Want to meet all ladies, legal age to 100. PTP318

IS HOW WE DO IT

Your Weekly Love Horoscope

Aries March 21-April 19

If you've been playing the waiting game in the emotional arena, it could be time to turn your anticipation into action. You're riding high on the energy of the playful Leo Moon in your 5th House of Romance. However, the urgency to free yourself from complicated entanglements standing between you and your happiness might prompt you to overreact. Instead of taking a risk, exercise a small dose of caution so you don't do something you regret. A new kind of love may be within reach, but you still have work to do before it's yours.

Taurus April 20-May 20

You may be excited and uneasy at the same time today, not quite knowing what to do with desires that don't fit your usual patterns. You might have the opportunity to participate in a social event involving eccentric people that stretch your mind. You're not even sure why you're tempted by exotic food, weird music or unconventional art. A sudden attraction to someone who isn't your type or boredom with your current situation can shake your world now. Nevertheless, staying open-minded could turn your day into one you'll never forget.

Gemini May 21-June 20

Your mental intensity takes your conversations to a place you rarely go. However, your unusually penetrating perception could also introduce distrust while Mercury swims in Scorpio's tumultuous waters, turning your mind's eye inward to uncover the root causes of your current dilemma. Unfortunately, a sudden wave of desire doesn't necessarily correspond to your intentions. Allow plenty of time to sort out the differences between what you feel in your gut and what your mind is telling you before making a major move.

Cancer June 21-July 22

On one hand, you yearn for the comfort of being with someone who accepts you as you are. On the other hand, you might sacrifice your true feelings to maintain stability so that those close to you may not even know the real you. Don't be afraid of changing your style and shocking someone with a personal disclosure today. If you are open and honest about your truth, your relationships will develop to reflect your integrity. Discomfort is often the source of growth.

Leo July 23-August 22

Your adrenaline surges today as unfamiliar emotions whisk you into new relationship territory. However, interactive Mercury's presence in mysterious Scorpio and your 4th House of Foundations prompts you to delve deeper into your psychological, spiritual and emotional roots. While you may be fearful of what you don't understand and can't control, you're willing to explore the unknown because you believe stability is waiting on the other side of the fence. Sigmund Freud wrote, "Out of your vulnerabilities will come your strength."

Virgo August 23-September 22

Volatile emotional dynamics can set your nerves on edge today. It's more than likely that you will pursue connecting with a free-spirited person or revitalizing the flagging energy in an existing relationship. But you may be more suspicious of others now that curious Mercury is taking up all the oxygen in your 3rd House of Data Collection. Your current hunger for answers could be annoying if you turn it into an interrogation, so ease up on your investigation before you alienate those around you. In the words of Plato, "You can discover more about a person in an hour of play than in a year of conversation."

Libra September 23-October 22

A sudden jolt of awareness can be upsetting, but only if you try to hold onto your previous agenda. Plans with a friend or partner may be disrupted today as the sparks fly, highlighting shocking Uranus in your 7th House of Others. Although you are known to step into the role of peacemaker, you're no pushover now as communicator Mercury sinks into fixed Scorpio. Rather than waiting for something to happen, take control and turn the tables. Be the revolution, declare your independence and let freedom ring.

Scorpio October 23-November 21

Your laser-like mental radar sees through people's charades and hones in on the facts. Your discernment powers are strong now that cerebral Mercury is camping out in your perceptive sign. However, you might erratically jump to an incorrect conclusion even if you have solid information at your disposal. Your desire for excitement is irreplaceable today and could influence your behavior. Even if you believe you know the truth, let your emotions settle before you say something you can't take back. Thinking before acting is wisdom but acting before thinking is regret.

Sagittarius November 22-December 21

A sudden change in the emotional landscape can push you to the edge in a relationship now. Your urge to express what's in your heart is so persistent that you might open up to a complete stranger if you have nowhere else to share your secrets. Although impulsive actions could inadvertently create distance with an existing friend or lover, your real goal is to demonstrate your passion for life. Discussing your feelings instead of acting them out leads to solutions rather than problems.

Capricorn December 22-January 19

Anything goes as unusually deep feelings bump up against external resistance today. Nevertheless, you're likely to express your desires no matter how odd they may sound. In fact, remaining open to new forms of pleasure can bring unexpected rewards. Just as easily, your love life could be turned upside down when sweet Venus runs into reactionary Uranus, upsetting your plans or radically altering the direction of a relationship. Honest communication leads to understanding, intimacy and mutual appreciation.

Aquarius January 20-February 18

Very little escapes your incisive thinking now; your perceptions are on point and you are a force to be reckoned with in your interactions with others. Nevertheless, a simple flirtation can heat things up so quickly that you don't take time to logically consider the consequences of your actions. Making decisions in the spur of the moment might feel empowering but may lead your heart into an emotional briar patch. Let your desire for truth override your need for pleasure and your heart will be happier in the long run.

Pisces February 19-March 20

You may act impulsively one moment and freeze with fear the next. Or you might attract people whose behavior is as bewildering to you as yours is to them. Cerebral Mercury enters penetrating Scorpio and your 9th House of Higher Truth, empowering you to go the distance in your thinking. Unfortunately, your good sense could be short-lived as sudden attractions to new people, things or ideas turn into major distractions. Ben Franklin advises, "If passion drives you, let reason hold the reins."

ULTIMATE WINTER DRIVING TIPS

(NewsUSA) - Americans love their cars -- especially the classics. Coupled with a long road trip, well, it doesn't get better than that.

This winter, three vintage cars from the LeMay -- America's Car Museum will make the

trip of a lifetime when they participate in The Drive

Home, a 13-day journey from Tacoma, Washington,

ending in Detroit to coincide with the opening of the 2016 North American International Auto Show.

The ride will follow a 1957 Chevy Nomad, a 1961 Chrysler 300G and a 1966 Ford Mustang as they make their way back to The Motor City from Dec. 27 to Jan. 8. To ensure the drive is

safe and without incident, Michelin North America will be literally helping the caravan roll.

Traveling from the Pacific Northwest to Detroit that time of year will certainly offer some winter weather challenges along the way, says Ron Margadonna, Michelin tire expert. We're excited to help ensure the

rally is a safe and comfortable one with proper winter tires for each of these beautiful, classic vehicles.

Years ago, making this journey during the winter would have been nearly impossible because the tire technology just wasn't the same as it is today. Now that the vehicles can

be outfitted with technologically advanced winter tires, the cruise should be safe and seamless.

Whether you're driving cross country or across town this winter, consider these tips to help make your ride safer:

1 Take care of the outside: Check essential safety components like your tires, headlights and windshield wipers. Make sure you have proper tire pressure and enough tread, that your headlights are bright, and that your wipers are clean and in good

working condition. If the temperatures are still mild, it's also a good time to give your car a good wash and a protective coat of wax.

2. Have the right type of tire: All- season tires are effective for three seasons and in regions with light-to-moderate winter weather. However, when

winter precipitation is greater and/or when temps approach the freezing point and below, all-season rubber compounds begin to stiffen enough to compromise traction in emergency maneuvers or panic braking. If you're driving in a climate where the temperature consistently approaches the freezing point, consider winter

tires like the MICHELIN X-Ice Xi3 to better manage winter conditions.

3. Have a winter ready kit in the trunk: Be sure you know where your

ice scraper or snow brush is. It's not a bad idea to have an extra set of gloves and boots in the trunk, as well as a shovel, ice melt and jumper cables. Hopefully you'll

never need them, but better to be safe than sorry!

Don't Get Left Out In The Cold... PRACTICE TIRE SAFETY

(NAPS)—Rough roads aren't the only thing to worry about when the temperature drops. Tires also get cold and need extra grip to perform at their best. That's something your all-season tires might not be ready for. In fact, in temperatures of 45° F or

below, the rubber in all-season tires gradually hardens, leading to decreased road traction and less grip. That can cause difficulty with braking and turning. Winter tire safety experts urge drivers to consider the weather; if you often drive when it's below

45° F—snow or no snow—it's time for a set of winter tires to keep you and your family safe on the roads this year. “Winter tires are not just for drivers in cities that get snow and ice,” explained Mark Marrufo of DIS-COUNT TIRE.

“In temperatures of 45° F or below, the rubber in all-season tires gradually hardens, leading to decreased road traction and less grip.”

“Customer safety is our number one priority at DIS-COUNT TIRE, so we urge drivers to swap out their all-season tires to help ensure they don't suffer from any performance issues when driving regularly in temperatures below 45°.”

Winter tires use specially engineered tread rubber with enhanced compound to add the extra grip needed in winter driving conditions that

helps keep a car safely in motion without skidding off the road. This added grip provides 25 to 50 percent more traction in snow and ice than regular all-season tires. Tread design in winter tires also uses thousands of extra traction edges for exceptional grip in cold weather driving conditions where ice, snow, slush and water may be present. What many drivers may not realize is that precipitation can actually

pack in the larger grooves of all-season tires, leading to dangerous skidding and impaired braking.

Consider these five tire and road safety tips:

1. Replace your all-season tires with

superior cold traction winter tires if you regularly drive in temperatures of 45° or below. Make sure to replace all four tires to avoid an unsafe traction mismatch.

2. Don't forget the wheels when

switching to winter tires. Having a set of wheels specifically for your set of winter tires will save money in the long run. They pay for themselves by eliminating the cost of changeovers at the beginning and end of the winter season and by sav-

ing your expensive wheels from the wear and tear of ice, slush, snow and salt.

3. Check tire pressure regularly and don't forget to check the spare. Underinflated or over-inflated tires may result in poor handling, uneven tread wear and poor fuel consumption. For every 10° change in temperature, tire air pressure changes 1 psi.

4. Rotate your tires at least every 6,000 miles or earlier if irregular or uneven wear develops.

5. Make sure your tire shop properly torques the lug nuts

to the specifications for your vehicle when changing over to winter tires.

Drivers who are unsure whether winter tires are necessary for their vehicle can stop by any DISCOUNT TIRE location for a free safety inspection. To locate a store nearby, schedule tire service appointments or search tires and wheels by size, brand and style — or by vehicle year, make and model — visit www.discounttire.com.

Cold weather driving requires tires that are up for the job.

(StatePoint) Buying a vehicle? While your negotiation tactics matter, experts say that timing is a bigger factor than you may realize when it comes to getting a great deal on a new car.

“The time of year, the time of the month and even the time of day can affect the deal you get and what’s available for purchase,” says Brian Moody, executive editor of Autotrader. “Timing can be

everything if you want the best deal.”

Moody and the experts at Autotrader are offering some important timing insights to those on the hunt for a vehicle.

- Show up late. At the end of the day, sales and finance professionals are ready to head home. But a smart salesperson will not let a serious potential customer walk away just because the dealership

- Wait it out: Know what you want? Don’t rush to the dealership. If possible, consider waiting until the end of a month or even the end of a quarter to make your vehicle purchase.

is ready to close shop. Provided the salesperson is dealing with a serious buyer, he or she may make concessions during late hours to speed up negotiations.

Of course, shoppers may be tired and ready to go home, too, causing the plan to backfire. So make sure you’re well-rested and ready to hang in there for the long haul if you decide to pursue this strategy.

“Just like at the end of the year, dealers have monthly and quarterly sales goals. If they’re just shy of the target, they could be more motivated to get the deal done,” suggests Moody.

- Be in-season. The season you purchase your vehicle matters. For example, late summer and early fall is when new-model-year vehicles are rolling into dealers’ inventories. Some of the best deals are

on “leftover” models. For instance, a 2016 model may be steeply discounted once 2017 models arrive. In some cases, dealers will even have the previous model year in stock. For example, Autotrader.com still has listings for brand-new 2015 model vehicles.

Keep in mind though, that since a leftover model is already outdated, it’s automatically worth less than a car from the latest model -- which means you’ll get a lower price if you resell. If you plan to keep your car a long time, this shouldn’t be a big issue.

“For those who don’t have to have the latest and greatest model, this is an easy way to save,” says Moody. “However, don’t expect to get both the latest model and the best deal. It’s likely you’ll have to make some concessions if you want the best

possible price.

Don't Let The Wrong Battery Stall Your Outdoor Enjoyment

(NAPS)—Since it's hard to enjoy the outdoors if you can't start your car, boat, motorcycle or all-terrain vehicle (ATV), choosing the right kind of battery designed for your vehicle make, model and usage habits is very important. These tips can help.

Automotive Batteries

It's important to understand the tests used to measure battery performance. The two most common are cold cranking amps (CCA) and reserve capacity (RC). CCA measures the

number of amps a battery can deliver for 30 seconds at 0° F. This is a useful comparison-shopping tool because it's performed the same way by every manufacturer. RC measures the number of minutes a battery can withstand a continuous draw of 25 amps.

Today's vehicles have more onboard and consumer-installed electronics than ever before, and many systems require constant power even when the engine isn't running.

Frequent, short trips also increase the need for additional reserve capacity because the battery may not have enough time to recharge between stops and starts.

Results of both tests can be found on the battery or online. Check your owner's manual to find the right specifications for your vehicle.

Motorcycle & ATV Batteries

The most common powersport batteries are conventional lead-acid batteries and absorbed glass mat (AGM) batteries, also called maintenance-free batteries.

While conventional lead-acid batteries are typically less expensive, they require more routine maintenance. Users must visually check the electrolyte level through the opaque white case of the battery. If the level is low, it must be refilled with distilled water to keep up performance and avoid an explosion.

AGM batteries are more expensive but need less maintenance and perform well in extreme climates.

Conventional and AGM powersport batteries come with acid bottles for filling the batteries. A motorcycle battery charger should be used to activate these batteries once filled.

Marine Batteries

Marine batteries are different from car batteries. A marine battery needs to crank over an engine and supply the energy needed for continued accessory use.

For that, marine starting batteries—also known as cranking batteries—are a good fit. If you need to power many electronic devices, such as trolling motors, GPS or fish finders, a deep cycle battery can be better. To help, ACDelco offers a full line of automotive, marine and powersport batteries for most makes and models. To learn more and find the right battery to power your outdoor fun, visit www.acdelco.com.

Lights, Wipers: Keys To Seeing And Being Seen

(NAPS)—When the days get shorter, lights and wipers play a major role in safe driving, as the chance of an accident increases if you can't see or be seen.

"It's important to make sure your vehicle's lights and wipers are working properly so your visibility is not compromised and you can be seen by others," explained automotive expert Rich White. "From the driver's seat, you may not notice a light that isn't working, so inspect all of your car's lights and replace those that are out.

Also, inspect and replace wiper blades so you can see clearly when wet weather hits."

Learn About Lights

Lights are normal-wear items that require periodic inspection and replacement. The lighting system provides nighttime visibility; signals and alerts other drivers; and supplies light for viewing instruments and the vehicle's interior. You should replace dimming, rapidly blinking and non-functioning lights. In addition, here are four tips that can help keep you safe.

 Keep head-lights, tail-lights and signal lights clean. External dirt and debris can dim operational lights and keep them from being seen easily.

 Make sure your head-lights are properly aimed. Misaimed headlights blind other drivers and reduce your ability to see the road.

 If there's any doubt about whether your head-

lights should be on, turn them on. They not only help you see better in dim light, they make it easier for other drivers to see you.

 Don't overdrive your headlights. You should be able to stop inside the illuminated area; otherwise, you're creating a blind crash area in front of your vehicle.

What To Know About Wipers

The wiper system

keeps excessive water, snow and dirt from building up on the windshield, maintaining clear visibility. Many factors can accelerate the replacement interval of wipers, including operating conditions, frequency of use, material and type of wipers, and

sunshine. Wiper blades can deteriorate faster and need more frequent replacement if you drive a lot in dry places. Remember to check the rear window wiper blade, too.

Added White, who's executive director, Car Care

Council, "Keeping your vehicle's lights properly cared for and replacing wiper blades periodically will help ensure a safer ride, keeping the road ahead well lit and giving you a clear view."

WINTER IS COMING: IS YOUR FUEL READY?

(NewsUSA) - Winter is coming -- and that means it's time to store seasonal tools and recreational equipment. Safe, smart storage of motorcycles, RVs, power equipment and seasonal cars goes a long way towards keeping them at their best to ensure peak performance in the spring.

To keep the fuel in gas-powered ma-

chines and equipment in peak shape through winter storage, consider these three elements:

TIME IS THE ENEMY

Fuel in gas-powered equipment that remains in storage during the winter months needs to be stabilized to ensure easy starts and full power in the spring. Untreated fuel begins

to oxidize, losing quality and combustibility over time, which leads to engines that are hard to start or run rough.

FUEL

Draining gas from power equipment or cars is one way to prevent gunk and debris from forming, but it isn't always a practical solution. One alternative -- add a fuel stabilizer. How-

ever, you need to choose the right treatment to ensure maximum fuel quality. In general, ethanol-blended gasoline should be used within 30-45 days. However, an enzyme stabilizer, such as Star Tron Enzyme Fuel Treatment, will stabilize gasoline for up to 2 years. Star Tron does much more than simply stabilize; the unique enzyme formula

also helps improve fuel combustibility to ensure easy starts, full power, improved fuel economy and decreased emissions.

FORMULATION

Some fuel stabilizers contain many of the same anticorrosion and antioxidant additive packs that are already present in pump-grade gas. Adding more of these add-pack

compounds can degrade fuel quality causing engines to run rough and smoky when they are started after winter storage. An enzyme stabilizer is designed to work in conjunction with pump-grade gas additives to keep fuel fresh for maximum performance in the spring. Fresh fuel and easy engine starts are better for fuel economy, which means lower

emissions and less environmental impact. And it's not just for winter; an enzyme fuel treatment can maximize fuel quality all year long.
