Your Weekly Love Horoscope

Aries

March 21-April 19

Thankfully, you are surrounded by positive energy today, but you still secretly wonder if you can keep up with your ambitious agenda. Everyone seems to have an abundance of confidence in you while several planets send their energy to propitious Jupiter in your 7th House of Others. But working non-stop isn't necessarily the way to get more done. Making time for healthy activities produces a more positive impact in the long run. An old Chinese proverb says, "Tension is when you think you should be. Relaxation is who you are."

Taurus

April 20-May 20

You are grateful that your support network comes through when you need it today, but your associates still remain a mixed blessing. Although others arrive with encouraging words or offers to work on your behalf, they can also be extremely distracting. Everyone seems to have a story to tell and you appear to be the designated listener, regardless of whether or not you have the time. All social interactions extract a price now. There are no free lunches; if you want assistance from your peers, you must show up for them in return.

Gemini

May 21-June 20

Your mind is running on several parallel tracks today and your thoughts might be moving so rapidly that you momentarily forget who you are and where you're going. Although your recovery time may be so fast that others don't even notice your lapse of attention, this lack of concentration can throw your rhythm off. Instead of waiting for the next cerebral blip, channel your energy into one specific task at a time. Narrowing your focus expands your productivity.

Cancer

June 21-July 22

Although it may be back to work or school today, you wish you had an extra day to indulge in your favorite fantasies. In fact, concentrating on your assignments seems nearly impossible now. Instead of attempting to relentlessly power through your day, set a timer so you can focus on a task for a specific length of time, followed by a designated few minutes of daydreaming. Rather than driving yourself crazy trying to contain your attention within narrow slices of reality, find a rhythm of expansion and contraction that works best for you.

Leo

July 23-August 22

You possess a natural instinct for sensing what's around the next corner today, making this an opportune time to solidify your plans. But logical analysis isn't as helpful now as you might hope because even verifiable facts can still lead you in the wrong direction. The Moon's visit to your 11th House of Hopes and Wishes encourages you to close your eyes and let your imagination take you where it will. Let your dreams be bigger than your fears; your intuition knows no bounds.

Virgo

August 23-September 22

Business and personal relationships contain a layer of complexity today, requiring additional effort on your part to untangle all the emotional threads. You are being shown many opportunities now, but aren't ready to limit the field to just one yet. Nevertheless, your confidence is growing and you're quite certain that the right pieces will come together in the nick of time. Avoid making decisions prematurely; the longer you can keep your options open, the better the outcome.

Libra

September 23-October 22

Reestablishing your balance is tricky business when everything looks so good on the surface. But there are weak links to every chain and it's in your best interest to know where they are now and how much weight they can bear. Nevertheless, your positive attitude influences the results you want to achieve. But your good intentions are not enough to assure success, even while auspicious Jupiter aligns with Venus and Mars in your 6th House of Daily Routine. Richard G. Scott writes, "You become what you want to be by consistently being what you want to become each day."

Scorpio

October 23-November 21

People may be surprised by the steady stream of creative solutions you have to offer today. However, they can't see how much your current productivity stems from your spiritual perspective on life. The curious Gemini Moon is dancing in your 8th House of Regeneration, inviting you on a Magical Mystery Tour to explore the hidden shadows of your imagination. A wellspring of inspiration waits to be untapped by your intuition. Eleanor Roosevelt said, "It is better to light a candle than curse the darkness."

Sagittarius

November 22-December 21

Everyone seems a bit flaky now, making it difficult to know who you can trust. People might change their minds without warning today, even if they pledged their allegiance to your altruistic cause yesterday. It seems logical to tighten your control to make sure others hold up their part of the bargain. Nevertheless, adopting an authoritative stance will not work. Jump in and get your hands dirty without waiting for anyone else. Leading by example sends a clear message of integrity.

Capricorn

December 22-January 19

Oddly enough, you can get a bit nervous when everything is coming up roses. After a while, you can't help but begin to wonder where the thorns are hiding. Although positivity is an admirable trait, it's more important today to be realistic than optimistic. Only when you have a sensible perspective based upon seeing things in their true light will you be able to find satisfaction in your success.

Aquarius

January 20-February 18

You are at the top of your game today and believe that you can solve any problem that shows up at your door. Although your analytical skills are certainly on point, there will be no mind-blowing epiphany from the facts alone. A conceptual breakthrough is possible only if you're willing to step over the edge and into the irrational realms of intuition and feelings. As Albert Einstein said, "Logic will get you from A to B. Imagination will take you everywhere."

Pisces

February 19-March 20

You're willing to jump off an emotional cliff and delve into the deepest abyss today if it leads you to finding the truth. However, there is a battle being played out within your mind to determine whether it's wiser to trust your gut instinct or to stick with the facts now. The answer is a paradox not unlike the particle-wave duality of quantum physics. You can't assume that one frame of reference is better than the other; they each add a layer of richness to the whole.
