Ask Six Simple Questions To Select The Right Auto Repair Shop

(NAPS)—By asking six simple questions, you may be better able to identify the right auto repair shop to properly care for one of your most valuable assets, your vehicle.

What To Ask

1. Does the business employ ASE-certified technicians? Credentials and affiliations are indicators

of professionalism and the management's commitment to training and education.

2. Is the shop and customer waiting area clean and organized? Cleanliness

4. Does the business provide a written estimate? The business should complete a written estimate and request your signature prior to starting any repairs on your car.

5. Does the business offer a warranty? Most auto repair businesses offer a warranty on parts and labor and the warranty is usually in writing or posted in the waiting area.

6. Does the business have a list of satisfied customers or references that it is willing to give you?

Satisfied customers and recommendations from family, friends and neighbors are helpful in finding a good shop. Many auto repair facilities also have company websites that are worth checking out as they often include testimonials and additional information about the business.

3. Are customers greeted and treated in a friendly and respectful manner? Many auto repair businesses excel in the area of customer service and satisfaction. A simple phone call to the shop to inquire about their services or pricing for repairs can give you a glimpse of how they treat customers.

and organization are signs of a well-run business.

“A vehicle is a major purchase for most people, so it makes sense to take the time to select an auto repair facil-

Genuine Nissan Ester Engine Oil or synthetic may be available at additional cost. No cash value. Offer expires November 30, 2018.

EXTEND THE LIFE OF YOUR OUTBOARD ENGINE WITH THESE STORAGE TIPS

(NewsUSA) - As summer winds down, every boat owner clings to those last few warm days to take his or her boat out on the water with family and friends. Unfortunately, summer doesn't last forever and as the sun sets on another boat season, it is time to start thinking about how to store your boat and outboard engine for those off-season months.

Proper off-season storage protects critical internal components from corrosive gummy deposits from unbound ethanol, which can damage your engine, fuel tanks and fuel system components. Proper winterization also helps to protect against the freezing of critical engine components. If left untreated, damage from corrosion, broken parts, and general repairs could cost you thousands of dollars as well as time on the water.

So, as you prepare for off-season storage, follow these easy winterization

steps to ensure your outboard engine is in tip-top shape for next season:

1. Flush out the engine with fresh water. Doing so will flush out excess salt, dirt, sand, and other contaminants, and prevent blockage and corrosion of critical cooling system components.

2. Add fuel stabilizers. Pour quality fuel stabilizers into the gas tank to prevent the breakdown of ethanol and other deposits from ruining your engine. Be sure to run the engine after adding the stabilizer to the fuel tank to ensure that it reaches fuel system components in the engine.

3. Keep the fuel tank full. Storing your boat with a full tank of fuel, particularly if ethanol fuel is used, will help minimize condensation that may occur within the fuel tank.

4. Fog the engine cylinders and carburetor intakes to help slow corrosion. The use of spray fogging oil will help protect internal engine components from corrosion. Spray fogging oil into the air intake while the engine runs, then disconnect the fuel line. Continue to

spray into the air intake until the engine dies. Evinrude E-TEC engine's auto-winterization feature streamlines steps one and four by flushing out the engine and fogging itself for a few minutes. After the engine has completed fogging, it will shut off and your engine will be ready for storage.

5. Change the oil in four-stroke engines. Changing the oil will remove moisture and harmful acids that have collected within the oil. These acids and contaminants could cause corrosion of internal engine components.

6. Drain and replace gear case lubricant. Milky colored gear lubricant is a sign that water has entered the gear case. If left unchecked, the water within the gear case can freeze, causing the gear case to permanently fail.

7. Ensure that the battery is fully charged and disengaged. A fully charged battery is less susceptible to damage during cold storage. A fully charged battery's freezing point is around minus 95 degrees Fahrenheit, whereas a partially-charged battery could freeze in temperatures as high as 20 degrees Fahrenheit.

You should always consult your owner's manual for specific winterization techniques, but following these quick, easy, and

relatively low-cost steps will protect your outboard engine and save you expensive maintenance costs next season.

AAA STATE - COUNTY CITYWIDE INSURANCE CLAIMS WELCOME!

A Clean Car Is Money In The Bank

(NAPS)—Purchasing a new car is a major financial investment. Keeping it clean can be an easy and inexpensive way to protect its resale and trade-in value.

"Many motorists procrastinate when it comes to cleaning their vehicles," said Rich White, executive director of the nonprofit Car Care Council. "Whether you do it yourself or have it cleaned professionally, proactively keeping your car clean on the outside and tidy on the inside will pay big dividends when it comes to maintaining your vehicle's value over time."

The Car Care Council suggests five simple steps to keep a vehicle clean, helping protect it from the elements and preserve its value.

• **Declutter**—Start the cleaning process by removing excess clutter from inside the car as it can be distracting and hazardous, especially when debris finds its way near the gas and brake pedals. Don't forget to clear out items that have

accumulated in the trunk as they can add extra weight and reduce fuel efficiency.

• **Clean the Interior**—The next step is to thoroughly clean the interior, wash the windows, and clean and install floor mats. Be sure to vacuum on a regular basis.

A clean and orderly interior lets you spot issues in the cabin so you can get them repaired before they get worse.

• **Wash the Exterior**—Give your car a good wash from top to bottom using products specifically made for automobiles.

Always clean the tires and wheels before washing the body and don't use the same washing mitt or cloth for both.

• **Wax Twice a Year**—Waxing not only protects a vehicle's finish, it makes subsequent washing easier. Before proceeding,

make sure there are no foreign particles on the paint. It's important to note that waxing should be done in the shade, not direct sunlight.

• **Fix Chips**—If you find minor paint damage, cover the paint chips as quickly as possible to prevent further

damage. For a quick fix until you can get paint touch-up supplies, dab a little clear nail polish on the scratch.

The Car Care Council is the source of information for the "Be Car Care Aware" consumer education campaign promoting the benefits

of regular vehicle care, maintenance and repair to consumers.

To order a free copy of the popular "Car Care Guide," visit the council's consumer education website, www.carcare.org.
