# LIVING

**The Peddler Advantage's Guide  
to Home Maintenance, Decor, & Lawn Care**

# Spring Maintenance Checklist for Homeowners

(StatePoint) As the weather warms, there are a few maintenance tasks every homeowner should consider completing. Use this checklist as your guide:

## Outdoor Upkeep

- Wash window exteriors for a better view.
- Clean gutters and downspouts to

ensure proper water flow. Neglecting this task for too long can cause rot, mold and damage to your foundation.

- Get your patio or deck in tip-top

shape for outdoor living. Sweep and hose it down. Remove patio furnishings from storage. Wipe down surfaces and vacuum cushions.

- Inspect lawn equipment and tools for needed maintenance, and fuel refills.

- Mow the lawn. Trim the edges.

- After the next rainfall, inspect your yard for standing water, which can damage your home and invite mosquitoes. Consider hiring a landscaper to level out an uneven lawn.

## HVAC

### Maintenance

- Change HVAC filters at least once each season (ideally monthly). Dirty filters make equipment work harder and cause more wear and tear on equipment. They also increase your energy bill and lessen indoor air quality.

- According to Energy Star, 20-30 percent of the air that moves through

the duct system of a typical home is lost due to leaks, holes and poorly connected ducts. Consider professional duct sealing for improved energy efficiency and lower bills.

- Check to see whether your furnaces and air conditioners bear the ENERGY STAR logo. If not, consider a new unit. A properly-sized and installed ENERGY STAR air conditioner uses up to 20 percent

less electricity than older models, and doing so may make you eligible for a Federal Tax Credit.

• Have a technician give your home's cooling system a pre-season tune-up so that everything is running efficiently by the time warmer weather arrives. You know the "personality" of your heating or cooling unit best, so be prepared to provide the technician with important information. No fact is insignificant, as it may help them

diagnose and fix a problem.

• Be sure that all HVACR installation and maintenance is performed only by a qualified professional. Read company reviews and ask the contractor if they have technicians certified by North American Technician Excellence (NATE). NATE-certified technicians have demonstrated knowledge of today's increasingly sophisticated heating and cooling systems. To find

a NATE-certified technician in your area, visit [Nate.org](http://Nate.org).

### Safety

• Carbon monoxide, often referred to as the "silent killer," is odorless, colorless and tasteless. Protect your family by changing the batteries on your carbon monoxide detectors and ensuring you have a detector on each level of your home. When changing a furnace filter,

make sure the new filter is correctly positioned and the access panel is securely fastened. Have your home's furnace inspected and serviced annually by a NATE-certified technician.

• Likewise, test all the smoke alarms in your home and replace batteries as needed. The National Fire Protection Association recommends smoke alarms on every level of the home, including every sleeping room and outside each separate sleeping area.

A little seasonal maintenance can go a long way to a safer, more beautiful and more eco-friendly home.

# A SIMPLE GUIDE FOR PLANNING A DIY BATHROOM PROJECT

(BPT) - Spending more time at home has put increased focus on bathrooms for homeowners, which is why one of the top home improvement trends of 2021 is adding

or updating these spaces. Fortunately, remodeling or adding a bathroom DIY-style can be much easier than you may think with some planning and expert tips.

From the inspiration stage to layout planning and beyond, there are many important factors to keep in mind. DIY expert Sammy Pampani shares simple

guidance and easy advice for a successful DIY bathroom project.

## DISCOVER INSPIRATION

If you want an update but are undecided on the design, begin your search for inspiration online. For

example, explore Pinterest and follow fellow DIYers, so you can create boards based on bathroom trends that interest you. Searching hashtags on other social media apps, like Instagram, will be helpful as well. Some example hashtags to search could be #diybath-

room, #diyflooring and #bathroomremodel.

## RESEARCH INEXPENSIVE ALTERNATIVES

Explore inexpensive solutions that are simple enough for a DIYer to install. For example, macerating

systems are options in places with no below-floor drainage that's typically required in bathrooms and/or if drainage is far away or not close by. One of these smart solutions is Saniflo's Saniaccess 3, an above-floor plumbing system with the ability to not only

discharge wastewater from a toilet, but also a variety of other sanitary fixtures, such as a sink, a bathtub or a shower. The simple installation process avoids breaking through walls or flooring, making it possible to add a bathroom nearly anywhere you'd like.

### KNOW TECHNICAL TERMS

As you explore inexpensive DIY solutions for the bathroom, make sure to understand technical terminology. You don't need to be a plumbing or electrical expert to be successful, but you want to be knowledgeable so you make the right choices and take the correct steps. What's more, having a basic knowledge of technical aspects will help you describe any issues accurately and get potential

problems solved if you need to contact the company's help center or call in a pro.

### LAY OUT YOUR BATHROOM DESIGN

Utilize basic tools to help plan the layout of your bathroom. For example, spreadsheets can provide a clear view of how designs will come together. Keep in mind, just because something looks good on paper does not necessarily mean it will be perfect in reality. It's important to be flexible and make necessary adjustments as you go. Having a layout to guide you will be essential to keeping track of what does and does not work. Create a timeline

How long would this project take a professional to do? Research the amount of time it

would take a professional to complete your project online through online articles and videos. Then take this number and add about 2 additional weeks since you're going the DIY route. If you're trying to hit a specific deadline, make sure to give yourself some wiggle room to account for unexpected delays as well.

### SAVE MATERIALS

If you have a little extra material or a product that went untouched, save it. This could include flooring, tile, paint and more. These items can come in handy in the future if you need to make a repair or can be repurposed for another aspect of your bathroom remodel.

(BPT) - You put a lot of care into curating your bedroom, but these days, it may look more like a gym or an office than your sleep sanctuary. In fact, Stanford

News points to several nationwide surveys, which found that more than half of Americans now working from home are doing so from their bedrooms.

To help reclaim your bedroom as a place designed for sleep, Joy Cho and Corey Damen Jenkins, interior design experts who work with Stearns & Foster - a luxury mattress company known for hand-crafted style and comfort - have identified the following design tips and trends to inspire your bedroom design and help you get the sleep sanctuary of your dreams.

the lifestyle brand and design studio, Oh Joy! - recommends adding a fresh coat of paint to give new life to your bedroom space. Consider painting an accent wall behind your bed, choosing a color that ties into other areas of the room using accessories, throw pillows or art.

Often, people assume they need to start from scratch and then feel overwhelmed while making their bedroom seem more inviting and cozy. Instead, Cho encourages thinking about color like layers - adding pops of a varying shade in small areas or using easily changeable items. Start with a limited color palette and utilize patterns to add depth to your space.

**RELAX WITH COLOR**

For a fun and easy weekend project, Cho - founder and creative director of

"The proper color palette is essen-

tial for creating the best sleeping sanctuary," states Corey Damen Jenkins, the nationally acclaimed interior designer behind Corey Damen Jenkins & Associates. "Certain color combinations may seem amazing in theory, but in application, disrupt sleeping patterns."

kins. There are countless options to match your personal style and he encourages people to "think beyond the box," especially in smaller spaces, as unusual alternatives such as a martini table can sometimes fit a space better than a traditional nightstand.

Stearns & Foster design and hand-craft every mattress using plush memory foam and patented, supportive coils - all wrapped in a navy blue velvet border to provide the most luxurious night's sleep for years to come.

recommends soft textures for every layer - from your mattress to your duvet cover, comforter and sheets. Cozy bedding looks and feels luxurious, and when paired with a high-quality mattress, is both classic and made to stand the test of time.

Additionally, Cho

### MAKE IT PERSONAL

### COZY UP IN BED

Decorate using objects with stories to tell, such as heirlooms passed down between generations and items picked up from travel or found at a vintage market. "Pieces that are collected and well-worn add meaning and therefore end up looking much more intentional and thoughtful," affirms Cho.

While the right décor is important for creating a cozy and inviting space while you are awake, both Damen Jenkins and Cho encourage their clients to invest in top-quality bedding and mattresses to make the biggest difference to your sleep and comfort.

Both recommend high end, hand-crafted mattresses for an upgraded sleep experience. The certified Master Craftsmen at

"Nightstands will always be both in vogue and in need for the bedroom," says Damen Jen-

# Spring Awakening: 5 EXPERT TIPS TO RENEW YOUR LAWN

(BPT) - As a homeowner, now is the perfect time to start thinking about lawn care again. Spring is your first - and best - opportunity to get your outdoor living space in top shape for the warmer

months ahead. And depending on where you live in the U.S., that window begins whenever the soil starts warming.

To help you get ready for a healthy, lush green lawn

this spring, TruGreen, America's #1 lawn care company, shares five things you should do.

**1)** Start with a spring cleanup: Spring cleaning

isn't just for the inside of your home. Your lawn has collected fallen leaves, sticks and other debris over the winter months. Leaving behind this plant matter can smother the growth of your lawn and leave behind unsightly dead patches on the turf. A cleanup will give your lawn room to breathe, so it can take in water and sunshine, as well as any fertilizer or weed control treatments.

**2)** Clean up the mower: Spring is also time to dust off the lawn mower, fill it with fresh fuel and get your first mow. The first mowing of the season removes dead blades of grass and encourages the lawn to start waking from its winter slumber.

**3)** Get a step ahead of weed growth: The return of crabgrass is

not something to look forward to, however, the good news is, you can get these and other unsightly weeds under control by applying a treatment before they start popping up around your lawn. But keep in mind, it's important to get the timing just right.

"Timing is critical when it comes to applying preventative weed treatments," says

Brian Feldman, TruGreen's Director of Technical Operations - North. "Treatment should be applied under very specific soil and temperature conditions. Otherwise, it won't work and you'll end up wasting both product and effort."

To take the guesswork out of weed control, consulting with a lawn care professional - such as TruGreen - can bring you peace of

INSURANCE

mind and deliver desired results.

**4)** Nourish your lawn: Spring presents yet another important window of opportunity to achieve a thick, healthy lawn. After being dormant all winter, it will need a dose of food to help it spring back to life and start growing.

Because by summer, your turf will be facing many stresses - heat, drought, insects and disease. A light application of fertilizer can help your lawn take full advantage of

spring growth and have it at its best. Don't forget your trees and shrubs, too! The amount of fertilizer needed varies with the age and where your trees and shrubs are located, so contact a professional for expert treatment.

**5)** Set a simple watering schedule: Regular rainfall is optimal for healthy grass. But when the sun is beating down and it's been more than a week since the last rainfall, you'll need to supplement the lack of rain with a sprinkler. Luckily, you can keep

it simple as most lawns will thrive and grow with one inch of water per week. To keep track, set a few empty tuna cans around the lawn. When they get full - indicating an inch of water - you can move the sprinkler to a different section. Trees and shrubs also need some watering TLC; keep them hydrated also, particularly when temperatures start to spike.

It's important to remember that every state and region has unique grass and plant types that

present their own needs and challenges. Yet, a thick, green lawn you will feel proud of is closer than you think. Call your local lawn professional and they'll create a plan that's tailor-made for your outdoor living space to get it into great shape this spring.

TruGreen prides itself on designing a lawn-care experience founded on customer needs and rooted in science. To find a professional in your region, visit TruGreen.com.

# Cook Up A Low-Maintenance Kitchen

(NAPSI)—An increasing number of families are finding how much fun it can be to cook and eat at home—but an easy-to-clean-and-work-in kitchen can make a big difference.

Here are five ideas on how to have one that can help you save time, effort, and expensive cleaning supplies.

**1.** Be clever about cabinetry: Choose simple, flat door

cabinets without molding or raised panels which can collect grease and dirt. Soft-close doors help reduce touch points.

**2.** When you get down to it, the right

flooring and a well-thought-out floor plan can reduce the likelihood of messes. The “work triangle”—from sink to refrigerator to cooking appliances—should be designed with an

ergonomic flow in mind so moving around the room is easier, faster and less likely to result in spills. Avoid textured linoleum or any flooring with wide seams and gaps.

**3.** Apply the same principles to appliances: Stainless steel is both beautiful and enduring and can now come in a fingerprint-resistant finish. If you store them in cabinets instead

of on countertops, that’ll keep them cleaner.

**4.** Hot ideas for stoves: Get sealed burners on gas cooktops; flat glass electric, and induction tops

make it far easier to wipe up spills. A strong ventilation hood with dishwasher-safe filters will reduce dust and grease in the kitchen so it doesn't settle on surfaces.

**5.** Be smart about sinks. Food-safe surfaces that reduce bacterial growth are important. A hygiene-friendly sink material solution, SILGRANIT by BLANCO, has a non-porous surface with a smooth

stone-like finish that resists stains, scratches, chips, acid and heat. The Hygienic Plus surface acts as a shield against dirt and germs while reducing bacterial growth by up to 98%. Plus, the material needs no harsh chemicals to keep clean—just soap and water or baking soda, since the hydrophobic surface pushes away dirt and water so it easily drains away.

**6.** A fact about faucets: Engineered with a solid brass body and a flexible, high-quality hose encased in stainless steel, the SOLENTA semi-pro faucet is both durable and easy to clean. It

also provides the ultimate hands-free experience by combining reliable materials with a sophisticated start-stop technology so there's less to clean while you're keeping clean.

(StatePoint) Is your garage in disarray? While you dream of a perfectly organized workbench or garage, your reality probably looks more like a sea of random toys, boxes and exercise equipment.

Every do-it-yourselfer knows a clean, organized garage is the key to efficient project planning and repairs around the home. As we head into warmer months, set aside the time to take charge of the space and finally create a sense of tidiness that will last year-round.

Follow these five tips to tame the mess and get your garage back in shape:

1. Invest in shelving that accommodates clear storage bins. When it comes to organizing and storing the assortment of cords, car care items, paint supplies and kid's toys littering your garage, nothing does the job better than clear storage bins. Not only can you categorize items by project or activity type, you can also easily stack them to save space without sacrificing the ability to easily

find what you need, when you need it. Invest in taller, wider shelving for the perimeter of the garage to accommodate your chosen bins.

**2.** Fix or dispose of anything broken or past its prime. There's nothing worse than scrambling to find a specific tool or product in an urgent situation, only to realize it's broken, damaged or dried out. As you organize, pay attention to textures, consistencies and expiration dates. Toss and replace any items that have seen better days. For broken tools that seem salvageable, like cracked hoses or broken handles, reach for a

professional grade, heavy-duty duct tape like T-Rex Tape to tackle the repair.

**3.** Utilize ceiling and wall space with hanging storage. From bicycles and skis to rakes and shovels, some equipment is better off stored up and out of your way. Install hanging racks or shelving above the area where you park your vehicles to store larger, heavier equipment, and use a double-sided mounting tape to attach hooks along the sides of your garage for lighter-weight items.

**4.** Stock up on the essentials so you can make repairs on the fly. While

it's great to have a wide assortment of tools and supplies, for many projects and repairs you really just need the basics – think max-strength water-proof tape, bungee cords, a hammer, nails and similar essentials. Use these items as the foundation of your garage workstation and stock up on extras to keep on-hand for emergencies, camping and other on-the-go uses.

**5.** Give everything a home. Aim to group supplies for similar activities, tasks and repairs together, giving each category a "home." In addition to helping keep things organized in dedicated

spaces, hanging frequently used tools and supplies on hooks or peg-board can make it easier to quickly scan the garage and find exactly what you need. Use your mounting tape to safely and securely create a space to store and display all your go-to items.

Interested in more solutions for all your home and DIY needs? Visit [www.trextape.com](http://www.trextape.com) for a wide variety project and repair ideas.

Whether you're working on your car or tackling a weekend DIY project, having all your tools and supplies in order will make all the difference.

(BPT) - Last year, many people took a fresh look at their outdoor living spaces, as life outdoors became of renewed importance as spaces to gather together. Backyards transformed into stay-

cation retreats, and front entries were revamped into spaces for social distancing reminiscent of old-fashioned porches.

No matter where you live, your outdoor space can

be enjoyed all season with simple upgrades using hardscapes, such as adding a fire pit for warm gatherings or an outdoor kitchen for the taste of summer all year. Whether you do it yourself or hire a

landscape professional, hardscaping materials - including natural stone, interlocking concrete pavers and retaining wall systems - can add value to your home and help set the stage for a heated

hot tub, cozy seating around a fire, wood-fired ovens for pizza parties and more.

1) Add a fire feature for chilly days and nights. A fireplace, fire table, fire pit, chiminea

or patio heater will enhance any outdoor space with warmth and ambiance. "One of our most popular hardscape installations features a fire ring surrounded by a seat wall," said Scott Arnold, man-

ager of Villa Landscapes in St. Paul, Minnesota. "A fire feature is a useful and beautiful addition to any outdoor space that you can enjoy all year." Fire pits and fireplaces also are available in kits including all

materials that are popular with do-it-yourselfers.

**2)** A dedicated outdoor cooking space lets you grill in any season. Along with multifunction grills, compact wood-fired outdoor ovens are popular choices, and hardscape designs can make the perfect countertop or grill island. “Cooking outside isn’t just for summer,” Arnold says. “Easily accessible grills, wood-fired ovens or outdoor kitchens

built with hardscapes are essential in outdoor spaces.”

**3)** Create easy access from indoors to outdoors. A raised patio, built with retaining wall units and pavers, is a low-maintenance solution as compared to a deck. Its surface absorbs heat and may help keep ice at bay. Pavers come in many styles, textures and colors, and require little to no maintenance if properly installed. “We often

vary paver shapes, colors and textures to define space and create distinct outdoor rooms,” says Arnold.

**4)** Consider year-round seating, such as seat walls created with segmental retaining wall units. “VERSA-LOK is the one block I do 90% of my projects with; it can do it all,” says Stan Genadek, owner of Genadek Excavating and Landscaping in Mendota Heights, Minnesota, and

creator and host of a YouTube channel on landscaping, "Dirt Monkey University." Says Genadek: "Because of its versatility and ease of installation, VERSA-LOK is the gold standard in retaining wall systems." Use it for retaining walls, freestanding and seat walls, couches, tiers with bermed seating, planters, columns, curves and more.

5) Accessorize with functionality in mind. Lighting, pergolas, shades, awnings, screens and year-round furniture should be considered in an outdoor space all-season refresh.

Low-voltage LED lighting can be installed between retaining wall units, under capstones and along paving stone patios and paths. Look for furniture, that's durable against the elements and doesn't need storage or maintenance other than cleaning.

Outdoor living is an essential part of everyone's health and well-being, and hardscaping materials help you create an outdoor space that adds value to your property and keeps you outside longer into the night, earlier in the spring and later into the season.
